PROFESSIONAL SUMMARY

Computer Science undergraduate and Full-Stack Developer with strong expertise in TypeScript, Next.js, React, and modern browser APIs. Experienced in building local-first web applications, client-side data parsing pipelines, and deterministic state management engines. Grounded in C/C++ memory management, linear data structures, and relational database systems.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript, Python, C, C++, HTML5, CSS3, SQL
- **Frontend & UI:** Next.js, React, Tailwind CSS, Zustand, UI/UX Accessibility
- **Backend & Databases:** Node.js, PostgreSQL, MySQL, SQLite, IndexedDB
- **Developer Tools:** Git, GitHub, GitHub Actions (CI/CD), Docker, Vercel, VS Code
- **Soft Skills:** Problem Solving, Critical Thinking, Creativity, Adaptability, Time Management

TECHNICAL PROJECTS

Lemniscate | *TypeScript, Next.js, IndexedDB, Zod, Web APIs* | [GitHub](#) | [Live](#) Apr 2024 – Aug 2026

- Built a local-first document processing application supporting 7 file formats (PDF, EPUB, DOCX) using pdf.js and JSZip for client-side parsing with zero server data exposure.
- Integrated an AI streaming interface using Server-Sent Events (SSE) for real-time token rendering, validated via runtime Zod schemas to guarantee structured data integrity.
- Implemented an on-device extractive text summarization pipeline, integrating IndexedDB with hash-based keying for persistent client-side document caching.

Dungeoncore Necromancer | *Next.js, React, TypeScript, Zustand* | [GitHub](#) | [Live](#) Jun 2026 – Aug 2026

- Developed a responsive web reading platform featuring a unified command palette with client-side fuzzy search for low-latency query matching.
- Engineered a procedural audio synthesis engine using the Web Audio API to generate real-time dynamic soundscapes, eliminating external audio assets and reducing payload size.
- Deployed a static-exported web application adhering to WCAG AA accessibility standards (keyboard focus trapping, ARIA live regions) via GitHub Actions CI/CD to GitHub Pages.

Archmage | *Next.js, TypeScript, Tailwind CSS* | [GitHub](#) | [Live](#) Jan 2026 – Aug 2026

- Engineered a browser-based arcade roguelike featuring 50 structured waves, 5 biomes, dynamically shuffled tyrants, endless progression, and responsive real-time gameplay systems.
- Designed deterministic gameplay mechanics in TypeScript, including seeded RNG, scaling difficulty curves, multi-element spell resonances, weighted reward cycling, and state-driven enemy/boss behavior.
- Implemented persistent meta-progression, accessibility controls, HUD systems, and synthesized dynamic audio using Web Audio API, delivering a fully client-side gameplay experience without accounts or backend services.

EDUCATION

Lovely Professional University Phagwara, Punjab

Bachelor of Technology in Computer Science and Engineering | CGPA: 7.98 Aug 2025 – May 2029

Christ Academy Junior College Bangalore, Karnataka

Pre-University Course (PUC / 12th Grade) – Science & Mathematics | Percentage: 86.0% May 2023 – Mar 2025

CERTIFICATIONS & TECHNICAL TRAINING

- **Computer Programming in C – iamneo Certification** | [Certificate](#) Jan 2026 – May 2026
- **Data Analytics Essentials – Cisco** | [Certificate](#) Feb 2026
- **Introduction to Cybersecurity – Infosys** | [Certificate](#) Mar 2026
