SKILLS SUMMARY

- **Languages:** TypeScript, JavaScript, Python, C, C++, HTML, CSS, SQL
- **Libraries & Frameworks:** Next.js, React, Tailwind CSS
- **Tools/Platforms:** Git, GitHub, GitHub Actions (CI/CD), Docker, Vercel, VS Code
- **Backend:** Node.js, PostgreSQL, MySQL
- **Soft Skills:** Team Collaboration, Problem-Solving, Adaptability, Communication, Critical thinking, Leadership

PROJECTS

[Lemniscate](#) | TypeScript · Next.js · IndexedDB · Zod [GitHub](#)

Nov 2025 - Aug 2026

- Built a local-first document processing web application supporting 7 file formats (including PDF, EPUB, DOCX) utilizing pdf.js and JSZip for fully client-side parsing with zero server data exposure.
- Integrated a modular AI streaming interface using Server-Sent Events (SSE) for real-time token rendering, validated by runtime Zod schemas for structured output integrity.
- Implemented an on-device extractive text summarization pipeline, integrating IndexedDB with SHA/hash-based keying for local document caching.

[Dungeoncore Necromancer](#) | Next.js · React · TypeScript · Zustand [GitHub](#)

June 2026 – Aug 2026

- Developed a dynamic web reading platform featuring a unified command palette (Cmd+K) with fuzzy search for low-latency client-side indexing and query matching.
- Designed a procedural audio synthesizer utilizing the Web Audio API to generate dynamic audio in real time, eliminating external media assets and optimizing initial bundle payload.
- Deployed a fully static-exported, zero-server web application adhering to WCAG AA accessibility standards (keyboard focus trapping, ARIA live regions) via GitHub Actions CI/CD.

[Luck-O-Matic 9000](#) | TypeScript · Next.js · Tailwind · Web Audio API [GitHub](#)

Jan 2026 - Aug 2026

- Engineered an interactive web application featuring dynamic state-driven progression, multi-tier inventory structures, and responsive UI components built with Tailwind CSS.
- Built a deterministic state-management engine in TypeScript using immutable reducers and time-delta calculation to process asynchronous background calculations.
- Implemented client-side data persistence utilizing Local Storage APIs, ensuring continuous state synchronization and data integrity across browser reloads.

TRAINING

Computer Programming in C - iamneo | [Certificate](#)

Jan 2026 - May 2026

- Completed rigorous coursework in C covering foundational syntax, control flow, POSIX standard libraries, and structural programming patterns.
- Implemented low-level memory management solutions using explicit pointer arithmetic, dynamic heap allocation (malloc/calloc/free), and structured data layouts.
- Engineered linear data structures (linked lists, dynamic arrays) and algorithmic routines focused on pointer manipulation and time/space complexity optimization.

CERTIFICATES

- **Data Analytics Essentials by Cisco** | [Certificate](#) Feb 2026
- **Introduction to Cybersecurity by Infosys** | [Certificate](#) Mar 2026
- **Master Your Leadership Effectiveness Skills by LinkedIn** | [Certificate](#) Nov 2025

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
Bachelor of Technology - Computer Science and Engineering
CGPA: 7.98
Aug 2025 - May 2029
- **Christ Academy Junior College** Bangalore, Karnataka
Pre-University Course (PUC/12th)
Percentage: 86%
May 2023 – Mar 2025
- **New Horizon High School** Bangalore, Karnataka
Percentage: 92%
May 2022 – Mar 2023
