PROFESSIONAL SUMMARY

Frontend-focused Software Engineer building local-first, client-side applications in TypeScript, Next.js, and React — including multi-format document parsing, real-time streaming UIs, and offline-capable state architectures. Comfortable with C/C++ fundamentals and relational databases; currently extending into backend API development and LLM-integrated systems.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, C++, SQL
Frontend: Next.js, React, Tailwind CSS, Zustand, HTML5, CSS3
Client/Browser Systems: IndexedDB, Web Audio API, Server-Sent Events, Zod (schema validation)
Tools: Git, GitHub, GitHub Actions (CI/CD), Vercel, VS Code

PROJECTS

- Lemniscate** | TypeScript, Next.js, IndexedDB, Zod, Web APIs | [GitHub](#) | [Live](#) Apr 2024 – Aug 2026
- Built a local-first document processor supporting 7 file formats (PDF, EPUB, DOCX) using pdf.js and JSZip for entirely client-side parsing, with no data ever leaving the browser.
 - Consumed a token-streaming API via Server-Sent Events, rendering incremental UI updates in real time and validating every streamed payload against runtime Zod schemas to guarantee structural integrity.
 - Implemented an on-device extractive summarization pipeline and an IndexedDB caching layer with hash-based keys for persistent, offline-capable document storage.
- Dungeoncore Necromancer** | Next.js, React, TypeScript, Zustand | [GitHub](#) | [Live](#) Jun 2026 – Aug 2026
- Developed a responsive web reading platform featuring a unified command palette with client-side fuzzy search for low-latency query matching.
 - Engineered a procedural audio synthesis engine using the Web Audio API to generate real-time dynamic soundscapes, eliminating external audio assets and reducing payload size.
 - Shipped a static-exported reading platform meeting WCAG AA accessibility standards (focus trapping, ARIA live regions), deployed via GitHub Actions CI/CD to GitHub Pages.
- Archmage** | Next.js, TypeScript, Tailwind CSS | [GitHub](#) | [Live](#) Jan 2026 – Aug 2026
- Engineered a browser-based arcade roguelike featuring 50 structured waves, 5 biomes, dynamically shuffled tyrants, endless progression, and responsive real-time gameplay systems.
 - Designed deterministic gameplay mechanics in TypeScript, including seeded RNG, scaling difficulty curves, multi-element spell resonances, weighted reward cycling, and state-driven enemy/boss behaviour.
 - Implemented persistent meta-progression, accessibility controls, HUD systems, and synthesized dynamic audio using the Web Audio API, delivering a fully client-side gameplay experience without accounts or backend services.

EDUCATION

- Lovely Professional University** Phagwara, Punjab
Bachelor of Technology in Computer Science and Engineering | CGPA: 7.98 Aug 2025 – May 2029
- Christ Academy Junior College** Bangalore, Karnataka
Pre-University Course (12th Grade) – Science & Mathematics | Percentage: 86.0% May 2023 – Mar 2025

CERTIFICATIONS & TECHNICAL TRAINING

- Computer Programming in C — iamneo | [Certificate](#) · Jan 2026 – May 2026
- Data Analytics Essentials — Cisco | [Certificate](#) · Feb 2026
- GitHub Foundations — Datacamp & GitHub | [Certificate](#) · Mar 2026
